

Casamilano

Patagonia

Origin: Brazil.

The main characteristic of Patagonia marble, with its white, beige, yellow and orange colours, is its high variability from slab to slab, which makes it unique. The image is therefore purely indicative. We recommend not to pour acid substances as carbonated drinks and / or alcohol, oil, wine, vinegar and citrus or remove them immediately, avoiding affecting polishing.

For cleaning, we recommend very delicate products without solvents or corrosive substances. Treated with stain protection. Since marble is a natural product, any visible defects are to be considered the characteristics of the marble itself. As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative.
