

# Casamilano

## Dover White

Origin: Africa.

The white color has beige, rope and gray veins. The weave varies continuously and makes it possible to have areas with marked grain alternating with others with white spaces, creating a particular highly appreciated pebble grain. For a correct seal, it is recommended not to pour acid substances such as carbonated and / or alcoholic drinks, oils, wine, vinegar, citrus fruits or to remove them immediately, so as not to damage the polishing.

For cleaning, we recommend very delicate products, without thinners or corrosive substances. Subjected to a stain-resistant treatment. As marble is a natural product, any visible defects are to be considered as characteristics of the marble itself. As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative.
