

Casamilano

Arabescato viola

Origin: Italy.

This marble stands out for its exceptional chromatic characteristics and extremely varied design. The grain varies continuously in the slabs: for this reason, you can have areas with marked veins alternating with others with large neutral spaces. This feature gives originality and authenticity to a precious marble.

We recommend not to pour acid substances as carbonated drinks and / or alcohol, oil, wine, vinegar and citrus or remove them immediately, avoiding affecting polishing.

For cleaning, we recommend very delicate products without solvents or corrosive substances. Treated with stain protection. Since marble is a natural product, any visible defects are to be considered the characteristics of the marble itself. As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative
