

Casamilano

Damasco

Origin: Turkey.

Brown spotted with shades of brown, more or less intense, and veins. The surface is irregular for the presence of micro-holes that give the characteristic of the natural marble. Material processed in a traditional way, with last generation machines and polished with natural waxes to respect the essence of nature. For a correct seal, it is recommended not to pour acid substances such as carbonated and / or alcoholic drinks, oils, wine, vinegar, citrus fruits or to remove them immediately, so as not to damage the polishing.

For cleaning, we recommend very delicate products, without thinners or corrosive substances. Subjected to a stain-resistant treatment. As marble is a natural product, any visible defects are to be considered as characteristics of the marble itself. As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative.
