## Sahara Noir

Origin:Tunisia

The marble Sahara Noir is an extremely elegant marble. It displays a black background with gold and white veins, which make it a very sophisticated option for cladding, ideal for luxury and elegant environments. The finish is transparent glossy polyester.

For a correct seal, it is recommended not to pour acid substances such as carbonated and / or alcoholic drinks, oils, wine, vinegar, citrus fruits or to remove them immediately, so as not to damage the polishing.

For cleaning, we recommend very delicate products, without thinners or corrosive substances. Subjected to a stain-resistant treatment. As marble is a natural product, any visible defects are to be considered as characteristics of the marble itself. As marble is a natural material, the veins and colour tones can vary from slab to slab. Therefore the images are to be considered purely indicative.

## Colour Variations
