Stuccoed travertino Silver

Origin: Italy

Silver Travertine is a limestone sedimentary rock. It is a beautiful and durable natural stone. Travertino Silver is mainly beige in color with characteristic contrasting parallel veins that can vary from gray to brown; it is extremely porous. The porosity of Travertine is usually filled to increase the levels of resistance and compactness and for hygienic reasons, especially for surfaces of daily use.

<p class="MsoNormal">For a correct seal, it is recommended not to pour acid substances such as carbonated and / or alcoholic drinks, oils, wine, vinegar, citrus fruits or to remove them immediately, so as not to damage the polishing. For cleaning, we recommend very delicate products, without thinners or corrosive substances. Subjected to a stain-resistant treatment. As marble is a natural product, any visible defects are to be considered as characteristics of the marble itself. As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative.
