## Verde issogne

<p class="MsoNormal"><span lang="EN-GB">Origin: Italy </span>

<p class="MsoNormal"><span lang="EN-GB">

</span>

<p class="MsoNormal"><span lang="EN-GB">Verde Issogne is a holo crystalline limestone rock. It</span> is a high quality material characterized mainly by a dark-green colored background, which alternates almost black areas with lighter areas, interrupted by white / light veins. Thin white veins of calcite can be recognized. They have an irregular pattern and give the rock a large-scale brecciated appearance.

<p class="MsoNormal"><span lang="EN-GB">For a correct seal, it is recommended not to pour acid substances such as carbonated and / or alcoholic drinks, oils, wine, vinegar, citrus fruits or to remove them immediately, so as not to damage the polishing. </span><span lang="EN-GB">For cleaning, we recommend very delicate products, without thinners or corrosive substances. Subjected to a stain-resistant treatment. As marble is a natural product, any visible defects are to be considered as characteristics of the marble itself. </span><span lang="EN-GB">As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative.</span>

## Colour Variations
