Silver wave

<p class="MsoNormal">Origin: China

<p class="MsoNormal">Silver Wave is a holocrystalline limestone rock. It is characterized by a deep black background to which are added veins superimposed on the countless wavy shades of light grey, dark grey, gold, black and white. The trend of the grain can be more or less linear depending on the block.

<p class="MsoNormal">For a correct seal, it is recommended not to pour acid substances such as carbonated and / or alcoholic drinks, oils, wine, vinegar, citrus fruits or to remove them immediately, so as not to damage the polishing. For cleaning, we recommend very delicate products, without thinners or corrosive substances. Subjected to a stain-resistant treatment. As marble is a natural product, any visible defects are to be considered as characteristics of the marble itself. As marble is a natural material, the veins and color tones can vary from slab to slab. Therefore the images are to be considered purely indicative.
